

**PREPARED. FOR
EVERY MISSION.**

TORRAKA®

To really understand what is expected from you, what your job entails and what equipment you need - that's the core of Torrika's philosophy. We design functional workwear for you who work under the world's most demanding circumstances. We do this to ensure you wear suitable clothing and are properly prepared. For each challenging mission.

Each seam, pocket and feature of a Torrika garment is the result of an unique commitment and many years of development. The design comes about in close collaboration with climate physiologists, material developers and you, the user who wears the clothes daily. We take no shortcuts.

Our garments are designed in Sweden and manufactured in Europe. This means a reduced impact on the environment, superior quality and high delivery capacity. We subject the garments to extensive tests in the climate testing facility at the head office in Varberg, to ensure garments meet all demands and requirements. This is also where all our development activities take place - design, sawing and testing - under the same roof.

This results in functional work clothing, developed with a clear understanding of what it takes to keep you dry, warm and secure. That way, you can focus on your job, no matter under what the conditions. This is a task we take very seriously, which in turn allows you to come well prepared to yours.

MA Jacket

Mountain Arctic Jacket is developed in close collaboration with Mountain Warfare specialists who are located in the Alpine and Arctic environment. The jacket are tested in the most extreme environments and the most difficult conditions giving the soldier the right ability to perform at maximum. Designed for highly active activities such as ski touring and climbing. The jacket are used today in combination with other parts of our system of units in the climate zones C1 - C3. The jacket performs as well in the woods as in the high alpine terrain. The model is simple, robust and adapted to work with the other personal equipment used in Mountain Warfare.

The hood has a detachable Fur Trim if it is to be used in arctic conditions. Included when purchased.

FIELD UNIFORMS

Field Jacket

Field Jacket is configured in the same way as the CPA jacket. The operator will be able to have his kit and equipment in the same pockets when changing operational area or change in the climate. The jacket is perfect in a 3 season system for operations during spring, summer and autumn conditions. Developed as a smock that gives the operator a perfect option for LRRP operations or the like. Dries very quickly under field conditions. Breathes good during harder physical activity.

RF 250 Jacket

The RF 250 Jacket was developed in conjunction with our lightweight midlayer jacket and comes with a thicker lining which makes it suitable for lower temperatures and low-intensity activity. Considering its weight and volume, RF 250 Jacket is a high-performance insulating layer. One of the benefits of this jacket is that it doesn't retain moisture so it works well in all climates and for all activities as it dries quickly. The RF 250 Jacket is also reversible for use in wintry conditions.

Russel Trousers

Russel trousers are made for those who have an active outdoor life and need trousers that are smooth, durable and stretchy. Made in a dense poplin that is comfortable in summer, windproof and dries quickly in autumn, but at the same time it works well with a pair of long johns during winter. The knees are reinforced with Cordura and a thin 3D net mesh. A combination that tolerates intensive use but at the same time prevents the soil from penetrating when kneeling. Ventilation zippers on the thighs and on the calf gives you good flexibility for your comfort and ensures good ventilation in high activity.

Personal cam-net Winter

An individual camouflage net designed to cover a single operator's equipment. The net has eyelets along the edges, which allows several nets to be joined together, for example, when building a larger camp or observation point. The easiest method is by using heavy-duty plastic thread.

FACTS & PROPERTIES

ART. NO: 203142500

Product weight: 1300 g

WASHING INSTRUCTIONS _____**CE STANDARDS** _____

Cam-net Personal

A personal camouflage net with thermal protection properties designed to fit the individual operator's equipment. The net has perforated edging so that several nets can be linked if a larger camp or operational space needs to be built. This is easily done with a strong plastic wire. This net is also double-sided, which means greater flexibility and more versatility. The front side is 3-dimensional and provides good camouflage in forest environments, while the rear is 2-dimensional, which works better in mountain terrain, archipelagos and along coastal stretches.

FACTS & PROPERTIES

Bivy Bag 3.0

A light, practical sleeping bag cover that is easy to pack and carry with you. The upper part is made of Gore Tex membrane with exceptional breathability in order to release sufficient carbon dioxide. The bottom part of the Bivy Bag 3.0 is 100% water-resistant because the hardwearing Cordura fabric is impregnated with silicone to prevent water seepage.

FACTS & PROPERTIES

ART. NO: 203170624 SIZE: One size
Measure (flat): Length 275 cm, width 98 cm

COLOUR

TCIP - Olive

FUNCTIONS

Water-resistant
Windproof
High breathability

D3O TRUST LP2 Knee Pads

LP2 Knee Pads from D3O are an innovative protection solution and part of the Trauma Reduction and Unrivaled Shock Technology (TRUST) series. This internal knee pad has high shock-absorbing properties. The patented material provides a reduced transmitted force for superior impact protection, while the thinner and pre-bent design creates increased mobility and comfort in demanding environments.
